Re: Lead recycling policy.

Date: __08__ / __02__ / __2022__

This memo is regarding our lead recycling. We are bound by several federal and state regulations to handle and dispose or sell lead in a manner that is safe for our staff, customers and the environment. With this goal in mind, we are requiring all persons or businesses to be registered with the Texas Department of State Health Services. We will not discuss pricing, collection method, amounts of available metal or contracts with anyone who is not registered or representing someone registered through Texas Department of State Health Services. If you are registered you may email the business name, address and contact info to the email shown below and we will return your email within 48 hours. Please do not contact us until your registration is complete.
